Honorable Members in Session:

SUBJECT: Resolution Approving Negative Declaration for Grand Avenue
Assessment District

SUMMARY:

The Environmental Coordinator has reviewed the subject project and finds that it will not have a significant adverse effect on the physical environment and therefore recommends that the project and a Negative Declaration be approved by the City Council.

BACKGROUND:

In accordance with State EIR Guidelines for Implementation of the California Environmental Quality Act of 1970, dated December 1976, an Initial Study was performed. As a result of this study, it was determined that the Grand Avenue Assessment District would not have a significant adverse effect on the physical environment and a draft Negative Declaration was prepared. On November 6, 1981 the Negative Declaration was filed with the County Clerk. On November 19, 1981 Notice of Opportunity for Public Review of the draft Negative Declaration was published in The Sacramento Union. The appropriate length of time has elapsed for receipt of comments regarding the Negative Declaration, with no comments having been received.

RECOMMENDATION:

The Environmental Coordinator recommends that the attached resolution be passed which will:

1. Determine that the proposed project will not have a significant effect on the environment.
2. Approve the Negative Declaration.

(A project may impact on two or more separate resources where the impact on each resource is relatively small, but where the effect of the total of those impacts on the environment is significant.	—	—	<u>X</u>
d. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	—	—	<u>X</u>

III. DISCUSSION OF ENVIRONMENTAL EVALUATION (any "yes" or "maybe" answers must be explained - attached additional sheets if necessary)

~~7~~
7

- 1b. Minor Street Improvements will disturb top foot of soil in a few areas
- 3b. Additional runoff is insignificant
- 7. Street lights are one main purpose of this project. Added light is generally welcomed in these communities for safety reasons. Added glare is insignificant
- 14a. Maintenance for street lights & insignificant amounts of additional road, curb & gutter.

IV. Mitigation measures proposed to minimize environmental impacts for the project as identified above. (Explain in detail - if none, so state)

Road & Street Light Improvements are designed to approved standards. Construction inspectors shall be provided to insure all work is in conformity to the Plans & Specifications and best quality.

Normal constructive practices will be exercised to reduce noise and dust to a minimum during the constructive phase.

- V. Alternatives to the project which would produce less of an adverse impact on the environment (lower density, less intense land use, move building on site, no project, et cetera)

No protect is the only logical alternative. This would not be in the best interest of the neighborhood, however, because the area would remain with inadequate street lighting which could be a detriment to the public health and safety.

VI. DETERMINATION

On the basis of this initial study:

- I find the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described in IV above have been added to the project or the possibility of a significant effect on the environment is so remote as to be insignificant.
- I find the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT IS REQUIRED.
