Dear Dan:

Our firm prepared structural drawings for construction of an outdoor fireplace (our job number SP05-058, drawings dated November 11, 2003). A copy of our engineered drawing is attached. We understand the fireplace was constructed without the required pre-grout inspection. On June 1, 2005, a representative of our firm visited the site. The purpose of our visit was to use a Ground Penetrating Radar (GPR) to locate the placement, spacing, and depth of the reinforcing steel. We verified that the placement of all the reinforcing steel meets or exceeds the schedule on our structural drawings.

As a result, we recommend that the City of Sacramento Building Department approve this structure. If you have any questions, please call.

Very truly yours,
NEIL O. ANDERSON & ASSOCIATES, INC.
