CONCLUSION: ROUTE THROUGH  
UTILITIES

DATE: \_\_\_\_\_ BY: \_\_\_\_\_

Topography: Flat  
 Street Improvements: Existing  
 Utilities: Existing

Project Plans: See Exhibits A-C

Previous Files: None

Background Information: The northern portion of the site was the former Casilada Way that was abandoned during the construction of Interstate 5.

Additional Information: The applicant is requesting a variance to build two new single family residences on a vacant lot with a 7.5 foot rear yard setback at the narrowest portion for the attached garage of the southern unit. The rear yard abuts Interstate 5. None of the required living space is located within any setback area. The southern unit is located approximately 43 feet from the front property line in order to save an existing large oak tree on the site. Both units have attached two car garages located to the rear of the site with a shared driveway. The applicant is requesting relief from the rear yard setback requirement.

The project has been noticed and staff received one call requesting additional information regarding the proposed project.

Agency Comments: The proposed project has been reviewed by the City Utilities Department and the Building Division. The comments received pertaining to the variance have been included as conditions.

Environmental Determination: This project will not have a significant effect on the environment and is exempt from environmental review pursuant to State EIR Guidelines (California Environmental Quality Act, Section 15305(a)).

#### Conditions of Approval

1. There shall be no further expansion of the house, garage, porch, or any other structure into the rear yard setback areas.
2. Size and location of the buildings shall conform to the plans submitted. The applicant may modify the proposed footprint locations of the units (no closer to the rear set back line and still meeting all other Zoning Ordinance requirements) to meet Utility Department requirements. If the plans are revised then the applicant shall submit a revised set of plans to Planning staff for review and approval prior to submitting for building permits.
3. The applicant shall obtain all necessary building permits to complete construction.
4. Show all existing easements on the plans.
5. There are currently City sanitary sewer and water mains adjacent to the northerly and westerly property lines of the subject parcel. There is also an underground fire alarm

system along the northerly and westerly property lines connected to the control box located at the south westerly corner of the parcel. Prior to design, the applicant shall field verify the exact locations of the sewer and water mains and the fire alarm conduit, and show these utilities with the distances dimensioned from the property lines on the construction plans. The proposed structure including footings shall be a minimum of three feet from the center of the utility service farthest from the property line, or five feet from the property line whichever is the greater distance. The Department of Utilities Field Services will assist the applicant in field verifying the locations of City utilities. The applicant shall call the following for assistance: Farrell Crawford at (916)433-6224 for sewer mains and Jeff Heard at (916) 433-6229 for water mains. Also contact Terry Annesley at 264-8514 to ascertain whether the fire alarm system is still in service.

6. The applicant is responsible for the protection and repair of the City sanitary sewer and water mains during construction of the proposed structure. Contact Underground Service Alert at 1-800-642-2444 48 hours before work to begin.

**Advisory Notes:**

1. The project site is located in the 100-year floodplain, designated as an A99 zone on the Federal Emergency Management Agency (FEMA) Federal Insurance Rate Maps (FIRMs) that have been revised by a Letter of Map Revision effective May 22, 2000. Within the A99 zone, there are no requirements to elevate or flood proof.
2. The abandonment of the portion of Casilada Way westerly of Karbet Way per City of Sacramento Resolution # 226 recorded on 5/16/1968 reserving thereto a 10 foot easement along the northerly and westerly property lines of the subject parcel for the existing utility services. This easement shall be retained for maintenance and repair of underground services. This requirement shall be met by the applicant to the satisfaction of the Department of Utilities.

Findings of Fact:

1. The proposed project, as conditioned, is based upon sound principles of land use in that the proposed setback reduction will not substantially alter the characteristics of the site or the surrounding neighborhood.
2. Granting the variance does not constitute a special privilege extended to an individual applicant in that a variance would be and has been granted to other property owners facing similar circumstances.
3. Granting the variance request does not constitute a use variance in that the duplex is residential use that is permitted in the R-2 zone.
4. Granting the request will not be injurious to public health, safety, or welfare nor result in a nuisance in that:
  - a. there is adequate available yard area;
