

City Planning Commission
Sacramento, California

Members in Session:

- SUBJECT:
- A. Negative Declaration
 - B. Special Permit to Construct a 120 Unit Residential Care Facility for the Elderly
 - C. Lot Line Adjustment (P87-033)

LOCATION: Northwest corner of 39th Street and J Street

SUMMARY: The applicant's request to construct a 120 unit State-licensed residential care facility for the elderly was originally heard January 22, 1987 Planning Commission meeting. The item was continued so that the applicant could consider the concerns of the East Sacramento Improvement Association. As a result of meeting with association representatives, the applicant has revised the proposed site plan. Staff recommends approval of the project subject to the attached revised plans and conditions.

BACKGROUND INFORMATION: On February 6, 1987 the applicant, representatives of the East Sacramento Improvement Association and Planning Staff met to discuss the impact of the proposed building along the 39th Street frontage. As a result of this meeting, the applicant has revised the plans to provide a minimum 15-foot setback adjacent to the two-story portion of the structure and a minimum 20-foot setback adjacent to the three-story portion of the structure along 39th Street (Exhibit A-1). This modification will decrease a portion of the interior sideyard setback to 10 feet and provide modulation of the west elevation as previously recommended by Planning staff. Other changes to the project proposed by the applicant include the addition of window boxes and recessed balconies on the J Street elevation and a change in unit type mix to 32 studios, 42 studios with alcoves and 46 one-bedroom units (Exhibits 2-6).

The East Sacramento Improvement Association also expressed to the Planning Commission their concern that adequate parking be provided for residents, visitors and staff of the proposed facility. Staff, the applicant and association members have met several times and developed a parking management plan for the site which will insure adequate on-site and off-site parking for visitors, staff and residents (Condition 2). The plan will be reviewed by Planning Staff one year after occupancy of the project to determine whether the parking management plan requires modification.

RECOMMENDATION: Staff recommends that the Planning Commission take the following actions:

- A. Ratify the Negative Declaration;
- B. Approve the Special Permit subject to conditions and based upon the Findings of Fact which follow; and
- C. Approve the Lot Line Adjustment by adopting the attached Resolution.

Special Permit Conditions

1. A minimum 15-foot-building setback shall be provided along 39th Street adjacent to the two-story portion of the structure and a minimum of 20-foot-building setback shall be provided along 39th Street adjacent to the three-story portion of the structure as indicated by the attached site plan (Exhibit 1).
2. The applicant shall prepare a parking management plan for the project. The parking management plan shall be reviewed and approved by the Planning Director, ~~*included into the Deed of Trust for the property and~~ recorded with the County Recorder prior to issuance of building permits. *(staff amended to...*included into an agreement with the City for the property and...) The agreement shall run with the land. (staff added)*

The parking management plan shall contain the following elements:

- a. The northern 10-space parking lot and six spaces in the southern parking lot shall be reserved for residents and staff only. First priority for spaces in these lots shall be for residents. Remaining spaces, if any, shall be assigned to staff. A sign shall be posted at the northern parking lot indicating that this parking lot is for resident use.
 - b. The applicant shall notify the Planning Director after 12 on-site parking spaces are assigned to residents of the project. At this time the applicant shall prepare a plan indicating a specific location or locations where residents' vehicles shall be parked after the 16 spaces reserved on the subject site have been used. This plan shall be subject to the review and approval of the Planning Director.
 - c. The applicant shall provide parking for staff members of the project on the Mercy Hospital campus if parking for a staff member is unavailable on the project site.
 - d. Ten parking spaces shall be clearly marked for visitor use only in the southern parking lot of the project. If the 10 visitor parking spaces are filled, the applicant shall provide adequate information to visitors to direct them to additional off-street parking and provide additional parking for project visitors.
 - e. The applicant agrees that residents of the project will not participate in the on-street preferential parking program in effect in the area.
 - f. One year after occupancy of the project, the Planning Director shall review the project's parking management program. At this time the Planning Director shall determine whether any modifications to the parking management program, including the allocation of resident, staff and visitor parking, are necessary.
3. The applicant shall, through advertising, offer the residential structures located on the subject site for relocation purposes and/or transfer the structures to an interested house mover for relocation to a holding site prior to issuance of building permits. If relocation is not possible, then demolition may occur after review and approval by the Planning Director.

4. Revised landscape, shading and irrigation plans shall be submitted for staff review and approval prior to issuance of building permits. If possible, the applicant shall incorporate the existing evergreen tree along the 39th Street frontage into the landscape plans. Trees shall be planted in the setbacks adjacent to all four sides of the structure as indicated on the submitted plans.
5. Revised building elevations indicating additional architectural detail or modulation of the wall surfaces of the north and west elevations shall be submitted for staff review and approval prior to issuance of building permits.
6. A trash enclosure will be provided on-site and shall meet the following guidelines:
 - The walls of the trash enclosure structure shall be constructed of solid masonry material and the exterior surface finished in a manner compatible with the main structure(s).
 - The trash enclosure structure shall have heavy gauge metal gates and designed with cane bolts on the doors to secure the gates when in the open position. The hinges shall be sufficient in size, strength and number to adequately support the metal gates.
 - The walls shall be a minimum six feet in height, more if necessary for adequate screening.
 - The perimeter of the trash enclosure structure shall be screened with landscaping, including a combination of shrubs and/or climbing evergreen vines.
7. The applicant shall submit evidence that the project is a State-licensed residential care facility to the Planning Director for review and approval prior to issuance of building permits.

Findings of Fact

1. The project, as conditioned, is based upon sound principles of land use in that:
 - a. the proposed elderly residential care facility provide a needed type of care for senior citizens in the community; and
 - b. the proposal is compatible with surrounding residential, office, commercial and hospital uses.
2. The project, as conditioned, will not be detrimental to the public health, safety, or welfare in that:
 - a. adequate parking for employees, visitors and residents will be provided;
 - b. the proposal will not significantly alter the characteristics of the area.

3. The proposed project is consistent with the City's Discretionary Interim Land Use Policy in that the site is designated for commercial, multiple family; and single family uses by the 1974 General Plan and the proposed residential care facility for the elderly use conforms with the plan designation.

SUBJECT: A. Negative Declaration

B. Special Permit to Construct a 120 Unit Residential Care Facility
for the Elderly

C. Lot Line Adjustment (P87-033)

LOCATION: Northwest corner of 39th Street and J Street

SUMMARY: The applicant's request to construct a 120 unit State-licensed residential care facility for the elderly was originally heard January 22, 1987 Planning Commission meeting. The item was continued so that the applicant could consider the concerns of the East Sacramento Improvement Association. As a result of meeting with association representatives, the applicant has revised the proposed site plan. Staff recommends approval of the project subject to the attached revised plans and conditions.

BACKGROUND INFORMATION: On February 6, 1987 the applicant, representatives of the East Sacramento Improvement Association and Planning Staff met to discuss the impact of the proposed building along the 39th Street frontage. As a result of this meeting, the applicant has revised the plans to provide a minimum 15-foot setback adjacent to the two-story portion of the structure and a minimum 20-foot setback adjacent to the three-story portion of the structure along 39th Street (Exhibit A-1). This modification will decrease a portion of the interior sideyard setback to 10 feet and provide modulation of the west elevation as previously recommended by Planning staff. Other changes to the project proposed by the applicant include the addition of window boxes and recessed balconies on the J Street elevation and a change in unit type mix to 32 studios, 42 studios with alcoves and 46 one-bedroom units (Exhibits 2/6).

The East Sacramento Improvement Association also expressed to the Planning Commission their concern that adequate parking be provided for residents, visitors and staff of the proposed facility. Staff, the applicant and association members have met several times and developed a parking management plan for the site which will insure adequate on-site and off-site parking for visitors, staff and residents (condition 2). The plan will be reviewed by Planning Staff one year after occupancy of the project to determine whether the parking management plan requires modification.

RECOMMENDATION: Staff recommends that the Planning Commission take the following actions:

- all staff reports*
- A. Ratify the Negative Declaration
 - B. Approve the Special Permit subject to conditions and based upon the Findings of Fact which follow; and
 - C. Approve the Lot Line Adjustment by adopting the attached Resolution.

Special Permit Conditions

1. A minimum 15-foot-building setback shall be provided along 39th Street adjacent to the two-story portion of the structure and a minimum of 20-foot-building setback shall be provided along 39th Street adjacent to the three-story portion of the structure as indicated by the attached site plan (Exhibit 1).
2. The applicant shall prepare a parking management plan for the project. The parking management plan shall be reviewed and approved by the Planning Director, included into the Deed of Trust for the property and recorded with the County Recorder prior to issuance of building permits.

The parking management plan shall contain the following elements:

- a. The northern 10-space parking lot and six spaces in the southern parking lot shall be reserved for residents and staff only. First priority for spaces in these lots shall be for residents. Remaining spaces, if any, shall be assigned to staff. A sign shall be posted at the northern parking lot indicating that this parking lot is for resident use.
 - b. The applicant shall notify the Planning Director after 12 on-site parking spaces are assigned to residents of the project. At this time the applicant shall prepare a plan indicating a specific location or locations where residents' vehicles shall be parked after the 16 spaces reserved on the subject site have been used. This plan shall be subject to the review and approval of the Planning Director.
 - c. The applicant shall provide parking for staff members of the project on the Mercy Hospital campus if parking for a staff member is unavailable on the project site.
 - d. Ten parking spaces shall be clearly marked for visitor use only in the southern parking lot of the project. If the 10 visitor parking spaces are filled, the applicant shall provide adequate information to visitors to direct them to additional off-street parking and provide additional parking for project visitors.
 - e. The applicant agrees that residents of the project will not participate in the on-street preferential parking program in effect in the area.
 - f. One year after occupancy of the project, the Planning Director shall review the project's parking management program. At this time the Planning Director shall determine whether any modifications to the parking management program, including the allocation of resident, staff and visitor parking, are necessary.
3. The applicant shall, through advertising, offer the residential structures located on the subject site for relocation purposes and/or transfer the structures to an interested house mover for relocation to a holding site prior to issuance of building permits. If relocation is not possible, then demolition may occur after review and approval by the Planning Director.

4. Revised landscape, shading and irrigation plans shall be submitted for staff review and approval prior to issuance of building permits. If possible, the applicant shall incorporate the existing evergreen tree along the 39th Street frontage into the landscape plans. Trees shall be planted in the setbacks adjacent to all four sides of the structure as indicated on the submitted plans.
5. Revised building elevations indicating additional architectural detail or modulation of the wall surfaces of the north and west elevations shall be submitted for staff review and approval prior to issuance of building permits.
6. A trash enclosure will be provided on-site and shall meet the following guidelines:
 - The walls of the trash enclosure structure shall be constructed of solid masonry material and the exterior surface finished in a manner compatible with the main structure(s).
 - The trash enclosure structure shall have heavy gauge metal gates and designed with cane bolts on the doors to secure the gates when in the open position. The hinges shall be sufficient in size, strength and number to adequately support the metal gates.
 - The walls shall be a minimum six feet in height, more if necessary for adequate screening.
 - The perimeter of the trash enclosure structure shall be screened with landscaping, including a combination of shrubs and/or climbing evergreen vines.
7. The applicant shall submit evidence that the project is a State-licensed residential care facility to the Planning Director for review and approval prior to issuance of building permits.

Findings of Fact

1. The project, as conditioned, is based upon sound principles of land use in that:
 - a. the proposed elderly residential care facility provide a needed type of care for senior citizens in the community; and
 - b. the proposal is compatible with surrounding residential, office, commercial and hospital uses.
2. The project, as conditioned, will not be detrimental to the public health, safety, or welfare in that:
 - a. adequate parking for employees, visitors and residents will be provided;
 - b. the proposal will not significantly alter the characteristics of the area.

3. The proposed project is consistent with the City's Discretionary Interim Land Use Policy in that the site is designated for commercial, multiple family; and single family uses by the 1974 General Plan and the proposed residential care facility for the elderly use conforms with the plan designation.

RESOLUTION NO.

ADOPTED BY THE SACRAMENTO CITY PLANNING COMMISSION

ON DATE OF

APPROVING A LOT LINE MERGER FOR ALL OF LOT 6 AND
AND THAT PORTION OF LOTS 7 AND J AS SHOWN ON THE
"AMENDED PLAT OF MCINTYRE TRACT", FILED IN THE
OFFICE OF THE RECORDER OF SACRAMENTO COUNTY IN
BOOK 5 OF MAPS, MAP NO. 52 (008-032-18 THROUGH 18,
44 AND 45) (P87-033)

WHEREAS, the Planning Director has submitted to the Planning Commission a report and recommendation concerning the lot line adjustment for property located at the northwest corner of 39th Street and J Street; and

WHEREAS, the lot line adjustment has been given a Negative Declaration by the Environmental Coordinator; and

WHEREAS, the lot line adjustment is consistent with the 1974 General Plan and the 1963 East Sacramento Community Plan; the proposed project is found to be consistent with the City's Discretionary Interim Land Use Policy, in that the site is designated for commercial, multiple family and single family use by the 1974 General Plan and the proposed elderly residential care facility conforms with the Plan Designation;

NOW, THEREFORE, BE IT RESOLVED by the Planning Commission of the City of Sacramento:

that the lot line adjustment for property located at the northwest corner of 39th Street and J Street, City of Sacramento, be approved as shown and described in Exhibits A and B attached hereto.

CHAIR

ATTEST:

ASSESSOR'S-PCL. NO. 008-032-13,14,15,16,17,18,44,45

- APPLICATION:**
- A. Negative Declaration
 - B. Special Permit to construct a 120 unit residential care facility for the elderly
 - C. Lot Line Adjustment to merge eight lots

LOCATION: Northwest corner of 39th Street and J Street

PROPOSAL: The applicant is requesting the necessary entitlements to construct a 120 unit licensed residential care facility for the elderly.

PROJECT INFORMATION:

1974 General Plan Designation: Commercial, Multiple Family, Single Family
 1963 East Sacramento Community Plan Designation: Commercial, Multiple Family, Single Family
 Existing Zoning of Site: C-1, R-4, R-1
 Existing Land Use of Site: Shopping center, apartment & six single family dwellings

Surrounding Land Use and Zoning:	Building Setbacks:	Required	Provided
North: Hillhaven convalescent hospital; R-1	Front: (J Street)	No setback req.	149'
South: Church, offices; C-1	Side (Int):	5'	15'
East: Mercy Hospital, medical offices; H	Side (St):	12.5'	15'
West: Commercial, offices, single family, multiple family; C-1, R-3, R-1	Rear: (39th Street)	15'	15'

Parking Required: To be determined by Commission
 Parking Provided: 26 spaces
 Property Dimensions: Irregular
 Property Area: 1.7+ acres
 Square Footage of Building: 82,000 sq. ft.
 Height of Building: 35', 3 floors
 Topography: Flat
 Street Improvements: Existing
 Utilities: Existing
 Exterior Building Materials: Exterior cement plaster & brick with tile roof
 Exterior Building Colors: Beige, brick red, terra cotta

PROJECT EVALUATION: Staff has the following comments:

A. Land Use and Zoning

The subject site consists of eight developed lots totaling 1.7 acres in the Limited Commercial (C-1), Medium Density Multiple Family (R-4) and Single Family (R-1) zones. A retail commercial center is located on the C-1 zoned property. The leases of many of the tenants in the shopping center have expired and they have relocated elsewhere. A 20 unit apartment complex is located on the R-4 zoned property. Single family residences are located on the six remaining lots. Surrounding land uses include the Hillhaven Convalescent Hospital to the north, Sacred Heart Church and offices to the south, Mercy Hospital and medical offices to the east, and retail commercial, office, single family and an apartment complex for seniors to the west. The site is designated for commercial, multiple family and single family uses by the 1974 General Plan and 1963 East Sacramento Community Plan.

B. Applicant's Proposal

The applicant proposes to remove the existing buildings and construct an 82,000 square foot, 120 unit residential care facility for the elderly on the site. The facility would consist of 35 studios (377 square feet), 43 studios with sleeping alcoves (466 square feet) and 42 one bedroom (512 square feet) units. The facility is also proposed to have a dining facility, game and craft rooms, a library, a beauty shop for residents' use, a multi-purpose room and four lounge areas. The facility is proposed to be a state licensed care facility for the elderly and will provide assistance to residents with the activities of everyday living. These services include providing three meals daily, housekeeping services, transportation, reminding residents to take medication and other assistance if desired. The facility is anticipated to have a maximum of 10 employees on the site at one time, usually at meal times. The applicant also anticipates that some employees will be employed at both Mercy Hospital and the proposed facility.

Staff finds the proposed elderly care facility to be an appropriate land use for the site. There are no similar licensed residential care facilities for the elderly within the vicinity. While there are two adjacent uses that cater to senior citizens, the senior apartments to the west and the convalescent home to the north, the proposed use provides an alternative type of senior housing which will be compatible with these two uses. The subject site is within walking distance of medical offices, the hospital and various retail commercial uses along J Street and is on a major bus line. The proposed residential complex is also an appropriate transitional use between the hospital to the east and residential to the west of the site. Staff therefore supports the special permit request.

As noted above, there are six single family residences and an apartment complex presently located on the site. These structures appear to be in good condition and staff recommends that the applicant offer the structures for relocation to another site.

C. Design

The project is designed to have a minimum 15 foot setback from all property lines. This should provide an adequate buffer between the proposed project and adjacent residential uses. The site plan also indicates perimeter landscaping

and a minimum 15 foot landscaped setback at the corner of 39th Street and J Street and adjacent to the building along 39th Street. Staff recommends that a large evergreen tree located along 39th Street be incorporated into the landscape plans if possible.

The three story structure is designed so that at the southeast corner of the structure the height drops down to two stories in order to allow light and air to enter the interior courtyard. Staff finds that the proposed change in building heights also adds interest to the exterior elevations of the structure. The proposed 35 foot building is within the height requirements of the residential zones.

The exterior of the building is proposed to be constructed out of cement plaster and brick with a tile roof. Proposed colors are beige, brick red and terra cotta. The 39th Street and J Street elevations show some movement of wall surfaces; and the 39th Street elevation indicates planter boxes as a design feature on the second and third floor windows. Staff finds that the north and west elevations, however, have too much of an institutional quality and recommends that additional architectural detail or modulation of wall surfaces be provided to provide some break-up of the plane of these two elevations. Staff finds that the proposed elevations, with minor modifications, will be compatible with surrounding land uses.

D. Parking

The applicant proposes 26 parking spaces on the subject site. In addition, the applicant intends to enter into an agreement with Mercy Hospital to provide parking for residents of the care facility off-site across the street in the Mercy Hospital parking garages. With the construction of the new parking garages, approved by the Planning Commission on December 18, 1986 (P86-409), the hospital will have an excess of 112 parking spaces. The applicant anticipates that few residents will have their own automobiles and that they will use their vehicles on an infrequent basis. Staff finds that the proposed 26 on-site spaces should be sufficient for employee and visitor parking spaces and recommends that the applicant enter into an agreement with Mercy Hospital for additional resident parking.

E. Neighborhood Comments

The applicant and the East Sacramento Improvement Association have met several times to discuss the proposed project. On January 16, 1987 the association voted to oppose the proposed project due to the three story height of the structure and insufficient building setback along 39th Street. The association is supportive of the proposed elderly residential care land use with the condition that the use does not create an adverse parking situation for the neighborhood.

F. Lot Line Adjustment

The applicant is requesting a lot line adjustment to merge the eight lots into one in order to construct the proposed complex. The proposal has been reviewed

by the City Planning, Traffic Engineering, Engineering and Real Estate Divisions. There are no objections to the proposed merger.

ENVIRONMENTAL DETERMINATION: The Environmental Coordinator has determined that the proposed project will not have a significant adverse affect on the environment and has filed a negative declaration.

RECOMMENDATION: Staff recommends the Commission take the following actions:

- A. Ratify the Negative Declaration;
- B. Approve the Special Permit, subject to conditions and based upon findings of fact which follow; and
- C. Approve the Lot Line Adjustment by adopting the attached resolution.

Conditions

1. The applicant shall, through advertising, offer the residential structures located on the subject site for relocation purposes and/or transfer the structures to an interested house mover for relocation to a holding site prior to issuance of building permits. If relocation is not possible, then demolition may occur after review and approval by the Planning Director.
2. Revised landscape, shading and irrigation plans shall be submitted for staff review and approval prior to issuance of building permits. If possible, the applicant shall incorporate the existing evergreen tree along the 39th Street frontage into the landscape plans. Trees shall be planted in the setbacks adjacent to all four sides of the structure as indicated on the submitted plans.
3. Revised building elevations indicating additional architectural detail or modulation of the wall surfaces of the north and west elevations shall be submitted for staff review and approval prior to issuance of building permits.
4. The applicant shall enter into an agreement with Mercy Hospital to provide parking for the vehicles of residents of the care facility at the Mercy Hospital site. This agreement shall be submitted for Planning Director review and approval, and then signed and recorded prior to issuance of building permits.
5. A trash enclosure will be provided on-site and shall meet the following guidelines:
 - The walls of the trash enclosure structure shall be constructed of solid masonry material and the exterior surface finished in a manner compatible with the main structure(s).
 - The trash enclosure structure shall have heavy gauge metal gates and designed with cane bolts on the doors to secure

the gates when in the open position. The hinges shall be sufficient in size, strength and number to adequately support the metal gates.

- The walls shall be a minimum six feet in height, more if necessary for adequate screening.
 - The perimeter of the trash enclosure structure shall be screened with landscaping, including a combination of shrubs and/or climbing evergreen vines.
6. The applicant shall submit evidence that the project is a State-licensed residential care facility to the Planning Director for review and approval prior to issuance of building permits.

Findings of Fact

1. The project, as conditioned, is based upon sound principles of land use in that:
 - a. the proposed elderly residential care facility will provide a needed type of care for senior citizens in the community; and
 - b. the proposal is compatible with surrounding residential, office, commercial and hospital uses.
2. The project, as conditioned, will not be detrimental to the public health, safety, or welfare in that:
 - a. adequate parking for employees, visitors and residents will be provided;
 - b. the proposal will not significantly alter the characteristics of the area.
3. The proposed project is consistent with the City's discretionary interim land use policy in that the site is designated for commercial, multiple family, and single family uses by the 1974 General Plan and the proposed residential care facility for the elderly use conforms with the plan designation.

RESOLUTION NO.

ADOPTED BY THE SACRAMENTO CITY PLANNING COMMISSION

ON DATE OF

APPROVING A LOT LINE MERGER FOR ALL OF LOT 6 AND
AND THAT PORTION OF LOTS 7 AND J AS SHOWN ON THE
