SUBDIVISION REVIEW COMMITTEE RECOMMENDATION: On March 9, 1983 the Subdivision Review Committee recommended, by a vote of six ayes and three absent, to approve the proposal subject to the following conditions.

The applicant shall satisfy each of the following conditions prior to filing the final map unless a different time for compliance is specifically noted:

1. Enter into an agreement with the City to participate in any future assessment districts to provide street lights. A note shall be placed on the final map referencing the agreement;
2. Pursuant to City Code Section 40.319-1, the applicant shall indicate easements on the final map to allow for the placement of centralized mail delivery units. The specific locations for such easements shall be subject to review and approval of the City Engineer after consultation with the U.S. Postal Service;
3. Provide each lot (except the common lot) with separate sewer and water services;
4. The applicant shall submit homeowners' association Conditions, Covenants and Restrictions which provide for maintenance of landscaping, building exteriors, roofs and water and sewer facilities.

BACKGROUND INFORMATION: The subject site is located between the Sacramento River levee and Riverside Boulevard in the Sutterville Heights Community Plan area. The site is presently developed with an apartment complex containing 32 units. The 32 units are located in eight separate buildings with four units each. As proposed, the apartment buildings will be located on separate parcels for individual ownership. The open space and recreational facilities will become part of the common area and will be included in one lot.

STAFF EVALUATION: Staff has the following comments regarding this request:

1. Since the buildings will be owned separately on individual lots, the applicant will be required to provide separate sewer and water service to each lot.
2. In an effort to ensure maintenance of the common area, the applicant will be required to develop a homeowners' association with Conditions, Covenants and Restrictions which provide long-term commitment to common area maintenance.
3. Staff has no objections to the proposal since there will be no physical change in the existing development and the subdivision will only allow separate ownership of the eight apartment structures.
4. The Subdivision Review Committee indicated no objections to the requested subdivision modification to waive Parkland Dedication fees since the site is presently developed and is therefore exempt.

STAFF RECOMMENDATION: Staff recommends the following actions:

1. Ratification of the Negative Declaration;

2. Approval of the Special Permit, based on Findings of Fact to follow;
3. Approval of the Subdivision Modification to waive Parkland Dedication fees;
4. Approval of the Tentative Map, subject to the following conditions:

Conditions - Tentative Map

The applicant shall satisfy each of the following conditions prior to filing the final map unless a different time for compliance is specifically noted:

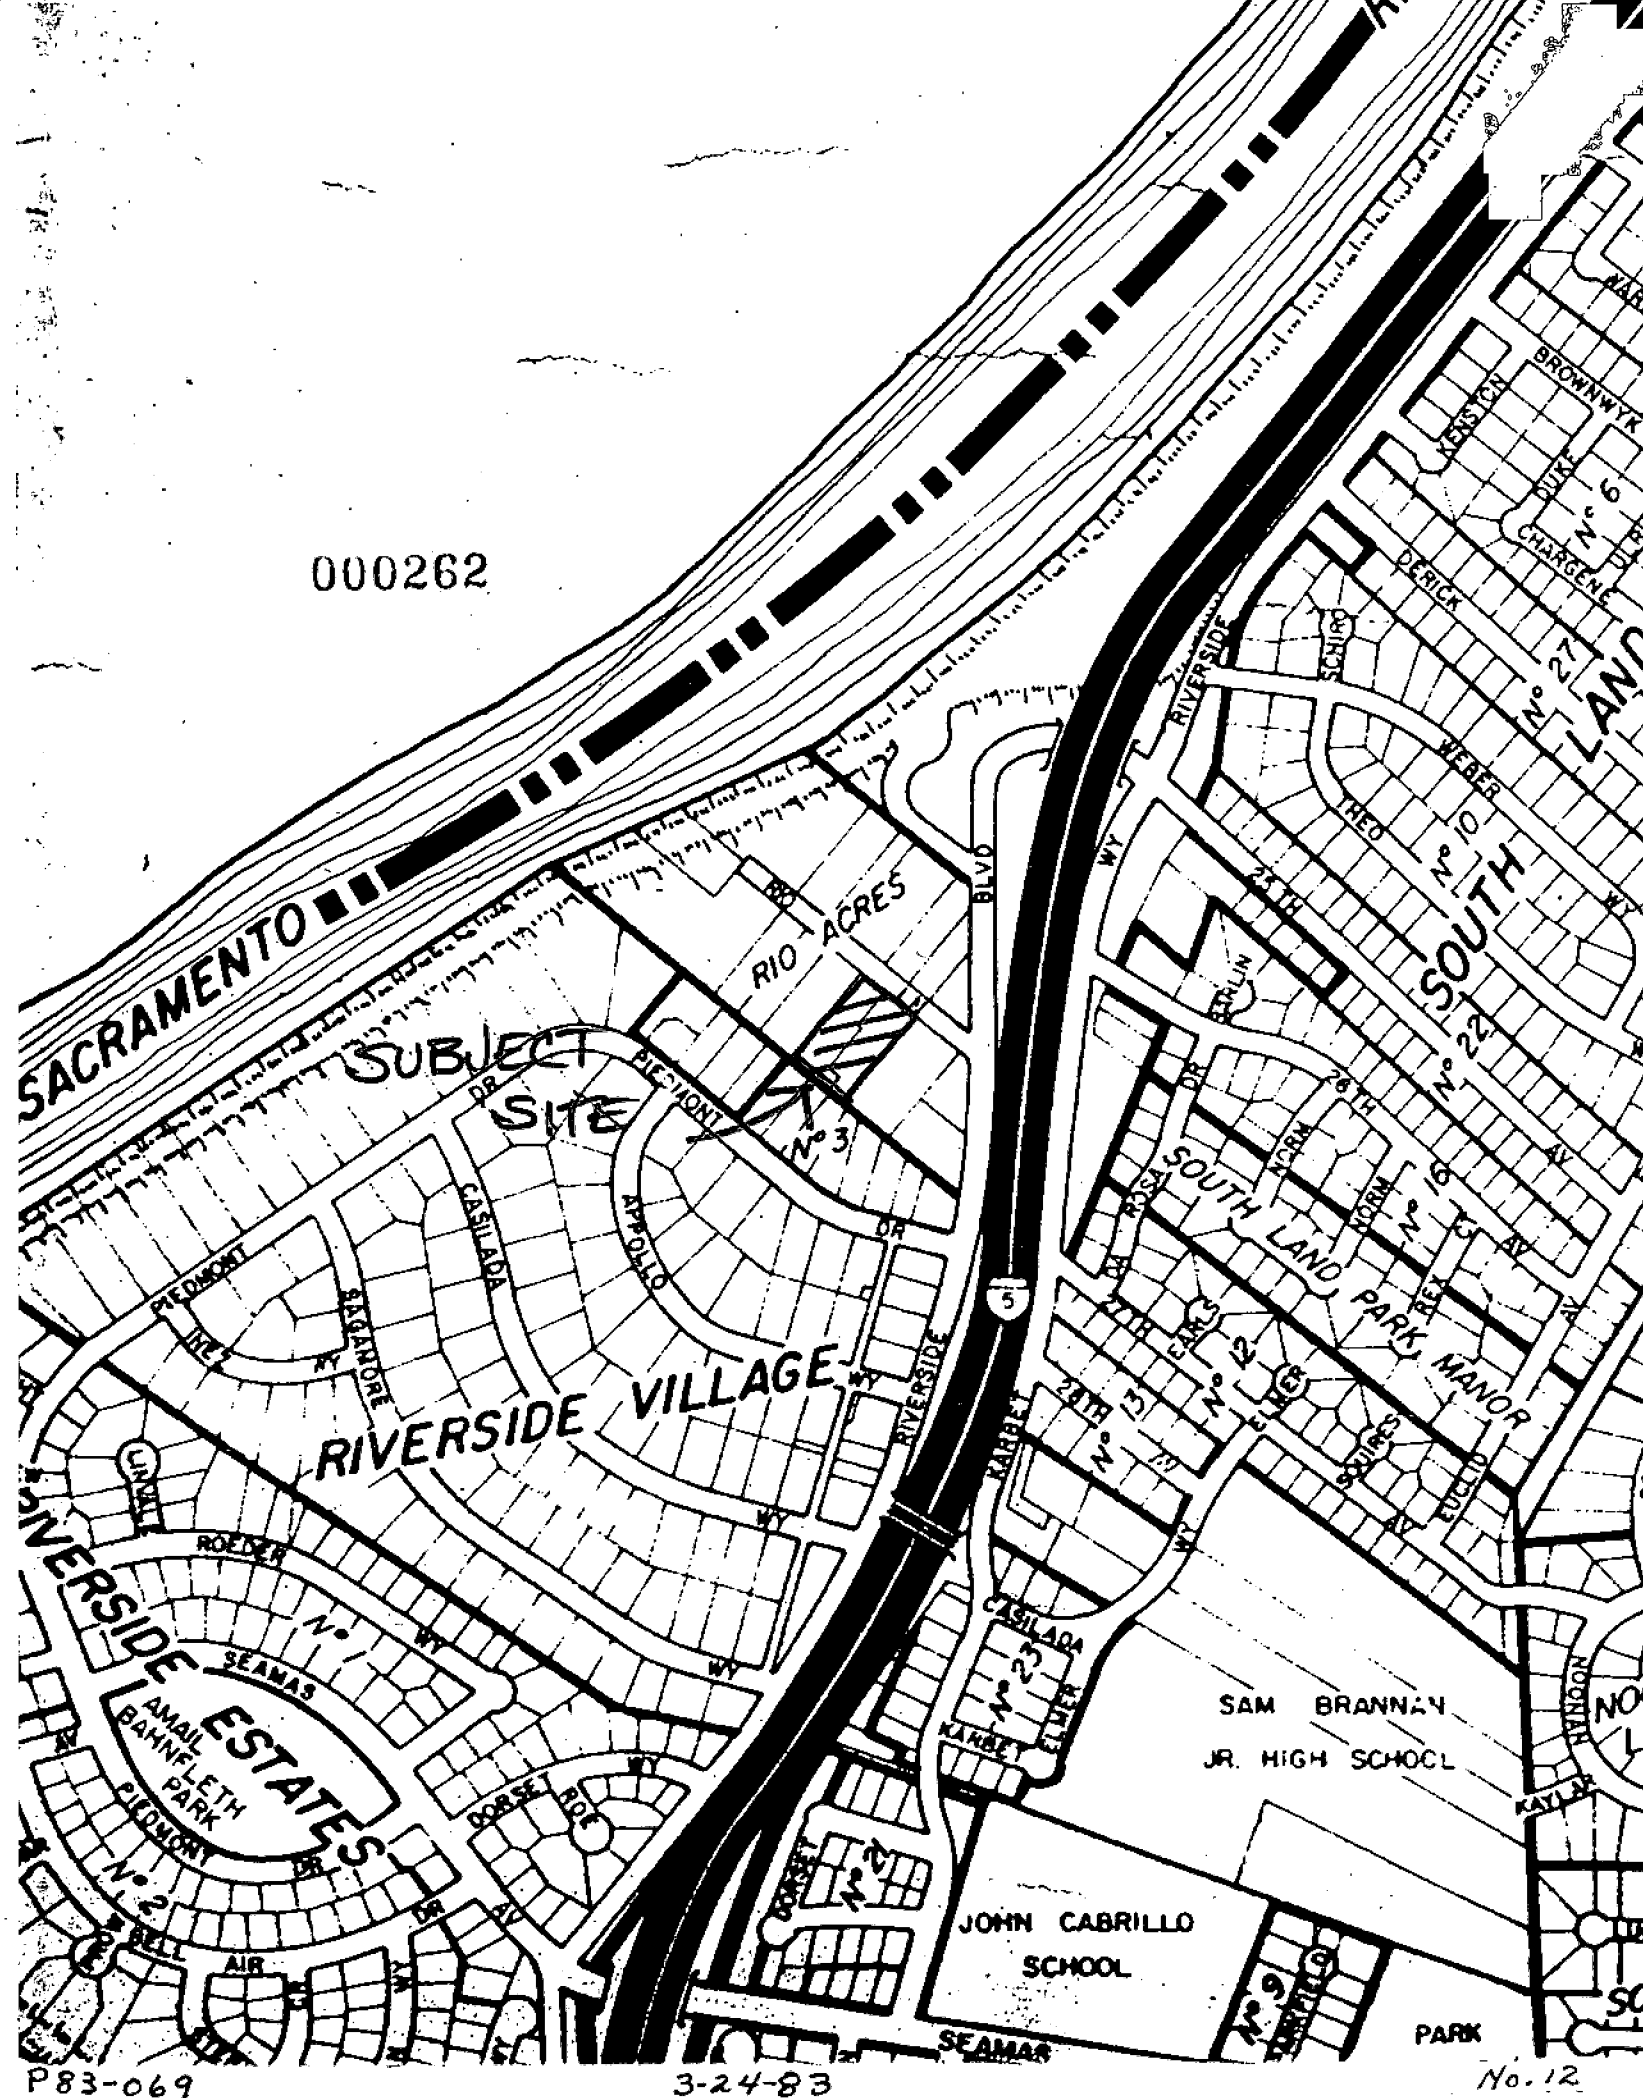

- a. Enter into an agreement with the City to participate in any future assessment districts to provide street lights. A note shall be placed on the final map referencing the agreement;
- b. Pursuant to City Code Section 40.319-1, the applicant shall indicate easements on the final map to allow for the placement of centralized mail delivery units. The specific locations for such easements shall be subject to review and approval of the City Engineer after consultation with the U.S. Postal Service;
- c. Provide each lot (except the common lot) with separate sewer and water services;
- d. The applicant shall submit homeowners' association Conditions, Covenants and Restrictions which provide for maintenance of landscaping, building exteriors, roofs and water and sewer facilities.

Findings of Fact - Special Permit

- a. The proposed development is based on sound principles of land use in that the apartment use will not change with individual ownership of the structures;
- b. The proposed project will not be detrimental to the public health, safety or welfare or result in the creation of a nuisance as conditioned in that a homeowners' association will be formed to ensure future maintenance of the common area;
- c. The project as proposed is compatible with the 1965 Sutterville Heights Community Plan and the 1974 General Plan which designate the site for residential uses.
