

B

Harter Rupert

Chief of Noise and Air Quality Branch of the Federal Highway  
Administration in the Office of Environmental Policy.

Mr. Rupert is out from Washington, D.C., to review the City's Noise Assessment and protection procedures in response to Mayor Iserberg. The Mayor attended in October 1979, a League of Cities and National Association of Counties Seminar on Land Use Control near freeways. The Mayor suggested that FHWA could better assist local municipalities by providing specific action plans and programs of avoiding or mitigating noise pollution from freeways. Subsequently, the Mayor offered the City's procedures to be reviewed to assist in the development of a national model for other municipalities.
